

BS 060

POWER COUPLING PORTABLE BORING MACHINE

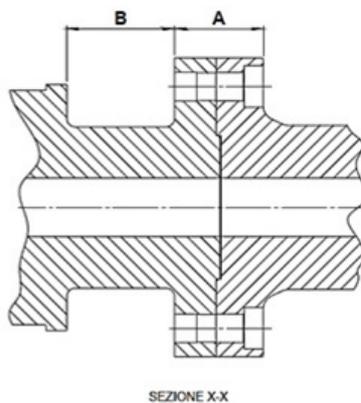

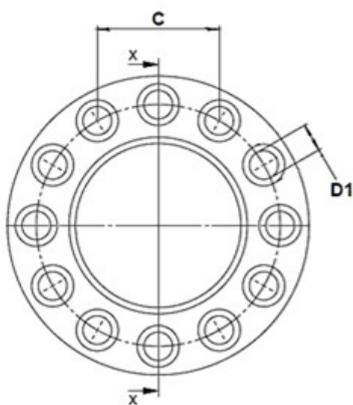

Compact portable machine that performs precise boring and facing, specifically designed to fit tight spaces.

Main features:

- Non-translating rotating bar
- Single motor drive for feed and rotation
- Adjustable supports for existing coupling bolt holes
- Compact gear-side mounting: the drive-side support can be mounted close to the gearbox to ensure minimum clearance during setup (dimension "B").
- Tilting supports: for precise centering and alignment

TECHNICAL DATA

Standard working stroke	510 mm
Optional working stroke	535 mm
Standard boring range	80-110 mm
Optional boring range	80-600 mm
Tool holder diameter:	8 mm
Tool feed rate:	0,08 mm/rev
Maximum bar rotation speed:	150 rpm

DETAIL OF JOINT DIMENSIONS

\emptyset min	Standard Working Stroke	Min. mounting clearance	Center-to-center distance
(D1) [mm]	(A) [mm]	(B) [mm]	(C) [mm]
80	510	255	157-521
